

## JUST ONE SENTENCE

This is about as basic as it gets. It's the starting point for all of climate science, and no credentialed skeptic I know of disputes it."

There you have it, from a credentialed climate scientist, Dr Roy Spencer, written on the sixth day of the sixth month of 2019: "It's the starting point for all climate science, and no credentialed skeptic I know of disputes it."

H/t to [Joe Postma](#) for finding this on the Facebook account of the mentioned climate scientist.

The context can be found by clicking this link

<https://climateofsophistry.com/2019/06/06/real-time-physics-debunks-climate-theory/>

In one single sentence a credentialed climate scientist debunks the entire climate alarm industry.

Further context can be gleaned from

<https://climateofsophistry.com/2019/01/10/how-long-is-twilight/>

No matter any other point of view, any other argument or any other consideration.

Spreading direct sunlight over the entire earth all at once is "**... the starting point for all climate science ...**".

That's also the sole reason for the invention of an atmospheric "[greenhouse effect](#)", for giving [carbon dioxide](#) its magical "climate forcing" ability and with that the entire basis for all climate alarm at the hands of the human emissions of carbon dioxide.

There is nothing more to add to this short message.

**You've all been had at the hands of credentialed climate scientists and their proprietary mathematics trickery.**

Hans Schreuder
